Skills

Programming: TypeScript, C++, Python, Java
Frontend: Angular, Tailwind, React, HTML, CSS
Backend: Django, NestJS, PHP
AI/ML: TensorFlow, Scikit-learn, Deep Learning
Tools: Git, Google Colab, Docker, Linux

Experience

Jr Software Engineer, Truck Lagbe LTD Jun 2024 – Present

- Developed and maintained key live features for the Admin Panel and Shipper Web using Angular, TypeScript, Tailwind CSS, and RxJS.
- Implemented Invoice generation with pdfmake, interactive data visualization with Chart.js, GPS playback using Barikoi Map, and integrated RESTful APIs.
- Participated in code reviews, managed version control with Git/GitLab, and tracked progress using Jira/Redmine, while following team-wide best practices to deliver cleaner code and performance to provide a smoother experience for Shipper Web and Admin Panel.
- Refactored and optimized existing codebases, resulting in better code quality, performance, and long-term reliability.

Education

East West University, Dhaka
BSc in Computer Science and Engineering Apr 2019 – Sep 2023
Graduated **Magna Cum Laude**

Capstone Project

Predicting Air Quality Index Using Deep Learning and Real-time IoT Data
IoT, Deep Learning, AQI Monitoring

Personal Projects

Homeschool – A Google Classroom Clone 🐙 [GitHub](#)

Stack: Django, Python, MySQL

- Role-based login and registration, classroom creation, posts, comments, assignment and grading.

CodeGrinder – A Programming Problem Recommender 🐙 [GitHub](#) — 🔗 [Live](#)

Stack: HTML, CSS, JS, PHP

- Analyzes coding profiles and recommends problems based on user rating and tag preferences.

Alopecia Classification Using Transfer Learning 🐙 [GitHub](#) — 🔗 [Live](#)

Stack: Flask, Angular, Tensorflow

- Trained a deep learning model using pre-trained CNNs for alopecia detection.

MUSIX - A Music Player App 🐙 [GitHub](#) — 🔗 [Live](#)

Stack: Angular, TypeScript, Tailwind CSS

- Built a music streaming web app using a public API with play/stop controls and playback tracking.

Achievements and Activities

- **Champion**, EWU In-House Programming Battle Summer 2022
- **Runner-up**, EWU In-House Programming Battle Spring 2023
- **Runner-up**, Data War - National Telco War EWU 2024
- Solved **1000+** programming problems
